Yusuf Tahir Aydin

Almere, Netherlands · +31 6 [redacted] · ttrtahir@gmail.com · linkedin.com/in/yusuftahiraydin

EDUCATION

Vrije Universiteit Amsterdam Sep 2026 – Jul 2027 (expected)
MSc Business Administration, Strategy & Organization
Coursework: Growth Strategies & Organizational Challenges; Strategic Entrepreneurship & Organization; Alliances, Mergers & Networks; Corporate Social Responsibility

Maastricht University 2022 – Jun 2026
BSc Data Science & Artificial Intelligence, Honours Programme
Thesis: Hankel tensor SSA against MSSA for decomposing multivariate financial time series

Boswell Beta 2021 – 2022
Schakeljaar (pre-bachelor programme)

EXPERIENCE

Comitatus Jan 2026 – present
Co-Founder & CEO
- Lead a three-person founding team building an equity valuation SaaS that now covers around 4,000 listed companies, priced as a free screener tier plus a $29 a month subscription.
- Designed the valuation methodology, combining residual income modelling, five-year projections and DCF on SEC EDGAR filings.
- Analysed entry into a second segment, selling IFRS fair-value and impairment work to valuation professionals, and compared our cost structure against the incumbent's licensed-data model.
- Run pre-seed fundraising and investor conversations, and wrote the five-year financial model behind the raise.
- Audited the production data before launch and caught valuation errors that had reached the public pages.

iLab Politie (Dutch National Police) Sep 2025 – Feb 2026
Research Affiliate
- Developed a patrol planning system using multi-agent PPO and graph neural networks on OpenStreetMap road data.
- Benchmarked it against expert-heuristic and behavioural-cloning baselines.
- Built a dashboard so that officers without a technical background could compare the planning options themselves.

APG Asset Management Sep 2023 – Feb 2025
AI Intern
- Built an intent-classification pipeline for ABP's customer web journey, testing SVM and XGBoost against generative AI models.
- Found the generative models beat the classical baselines, and deployed the result on Azure.
- Redesigned the intent taxonomy and added entity recognition, changing how incoming customer queries were routed.

LEADERSHIP & ACTIVITIES

Consulting College, Refugee Talent Hub Jul – Sep 2026
Participant
- Selected for a consulting training programme assessed by consultants from EY, Accenture, Roland Berger, TwynstraGudde and AEL.
- Worked a live workforce-planning case for PepsiCo Duyvis in a project team and presented the recommendations to PepsiCo managers.

SKILLS & INTERESTS

Technical Python · SQL and PostgreSQL · FastAPI · financial modelling and valuation (residual income, DCF) · LLM and RAG systems · reinforcement learning · graph neural networks

Languages Turkish (native) · English (C2) · Dutch (B1, reading)

Certifications IBM Agentic AI Professional Certificate (2026) · IBM RAG Professional Certificate (2026) · Strategic Management and Innovation Specialization, Copenhagen Business School (2026)

Interests Chess · ney and classical guitar · OSINT and accountability journalism · photography
